

Product Feature

1. Universal Input: 85-305VAC / 100-430VDC
2. Operating temperature range: -40°C - +85°C
3. Isolation: 4000VAC
4. SIP ultra-small size, high power density, flexible application
5. The mechanism has input undervoltage protection, output short circuit protection and over current protection
6. Design meet IEC/EN61558、IEC/EN60335

Note:

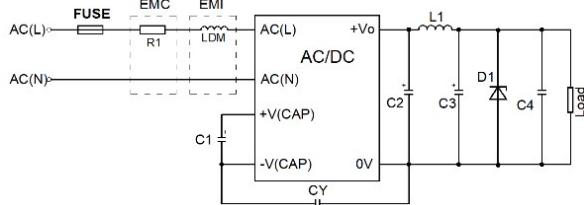

1. FUSE, EMC protection, and EMI protection are selected based on actual application needs;
2. C1 is a filtering electrolytic capacitor, which is a required component. It is recommended to use ripple current > 400mA@100KHz Electrolytic capacitors.
3. C2, C4, and L1 form a Pi type filtering circuit, and it is recommended to use high-frequency low resistance electrolytic capacitors or solid-state capacitors.
4. When selecting L1, ripple requirements can be considered, while paying attention to current and internal resistance values.
